## BLUSHIELD

### BLUSHIELD™

The morpho base carved respect the foot shape maintaining its natural anatomy. The nucleo of technology mediates the impact between the foot and the morpho base for an incomparable level of comfort. By fusing the morpho base and the nucleo Blushield minimizes the assymetrical behavior on the feet.

### NET BREATHING SYSTEM™

The synthetic fiber net is a breathable, waterproof membrane of the sole that allows ventilation while keeping moisture, mud and/or debris out of the shoe. The foot stays dry.

### DOUBLE ACTION

This exclusive Diadora system optimizes performance and protection. A gummy elastomer in the heel area absorbs shock while a highly flexible elastomer in the forefoot boosts forward thrust, enhancing flexibility and dispersing sole pressure for improved performance.

### DOUBLE ACTION 2

The Double Action shock absorption has been improved and made 'three-dimensional'. The back part in elastomer ends with four 'pistons' inserted directly into the back studs. This solution absorbs negative vibration at point of impact. The front part gives more power to the push in the front part of the foot.

### ERGOS NP

Ergos NP (nylon/polypropylene) is the anatomic footbed that is composed of two layers of material. The nylon material in the rear foot provides needed rigidity for stability. The polypropylene material in the forefoot increases flexibility.

### SUPRELL PRO 3L

SuprellPro3L is made from a special microfiber integrated with the external surface (upper) and the upper internal lining on a single structure.

### KANGAROO LEATHER

Constructed of premium, full grain kangaroo leather.

### MICROFIBER

Microfiber guarantees maximum lightness and sensitivity.

### TOUCH COUNTER

Touch Counter is a special ergonomic support in the heel area that improves grip and ball control at the back of the shoe.

### FLEX-ROTAX SYSTEM

Circular positioning of the studs in the forefoot facilitates turning in all phases of play with special studs to ensure traction. Multi-density outsole provides stability in the arch and heel, and strategic forefoot grooves allow exact forefoot flexion.

### FIBER TECH LASTING BOARD

An extremely lightweight lasting board composed of webbed nylon and contains flex grooves in the forefoot for flexion.

### TOUCH CONTROL

A special application on the upper optimizes ball control.

### MICROBE BARRIER

Special anti-bacterial treatment applied to the internal shoe fabric. The bactericide treatment stays after several washes.

### HIGH GRIP ZONE

A special lining that guarantees excellent grip between the heel and shoe, reducing pressure areas and preventing blisters due to rubbing.

### MORPHO CAGE S

Morpho Cage S is the particular heat-sealed cage made from soft TPU, and directly applied to the internal side of the upper, guaranteeing perfect closure and evenly distributing pressure on the foot, while improving foot stability during thrust phase thanks to the integration with sole and upper.

### WOMAN'S LAST

Shoe developed on a last which reflects the specific ergonomics of the female foot.

### 3 ACTION

This is the particular layout of some of the 12 fixed studs making up BSH12 polyurethane outsole, which improves positive traction during takeoff while lifting the foot off the ground and negative traction during dribbling or while changing direction, always in total harmony with the BLUSHIELD system.
